- **Glasgow Law and Philosophy Network Launch**

We are pleased to announce the launch of our interdisciplinary network with the Philosophy Department in the University. The Law and Philosophy Forum brings together researchers from Law and Philosophy who share an interest in foundational questions about the law: how to understand key legal concepts, the structure and methods of legal reasoning, as well as the nature of legal facts and legal normativity in general. The Forum supports an interdisciplinary approach to these questions, drawing on members' expertise in metaphysics, epistemology, philosophy of language, as well as moral and political philosophy. Deepening our understanding of the foundations of law and legal systems ultimately has a practical purpose for us: to help us confront the key legal and political challenges of our age, and promote modes of governance that respect equality, freedom and respect for diverse forms of human flourishing.
